PROFESSIONAL PROFILE

Harry Lewis is a Senior Technical Staff Member, Open Standards Strategist, and Intellectual Property Portfolio Manager supporting the Research, Development, Intellectual Property & Legal communities within the IBM Corporation. As an entrepreneurial IP resource manager, my responsibilities include technology, patent and brand licensing, cross licensing, patent valuation and assignment, patent disclosure review, portfolio assessment, pipeline generation, financial management, and ensuring high customer satisfaction. I have experience working with the IBM Fellow, Distinguished Engineer and Master Inventor communities while driving the monetization of intellectual assets outside of traditional product and services channels. I am an industry leader in print and imaging open standards, and a product and marketing technology strategist.

EXPERIENCE

- Achieved \$20M income from Intellectual Property in 2006 from technology, patent and brand licensing, cross licensing and patent assignment.
- Expanded IP licensing pipeline by bridging print (imaging) across technology lines into life science and medical imaging applications.
- Formed an Imaging Community of developers and scientists across IBM to mine and aggregate an otherwise disassociated set of intellectual assets from myopic product teams for IP income opportunity.
- Key technical staff member and technology strategist in the areas of print and imaging, device management, autonomic systems, software componentization, output management services, enterprise integration, workflow, web services and business process development.
- Chairman of the IEEE-ISTO Printer Working Group (5 years) leading web-services based manageability and imaging services standards.
- Member of Trusted Computing (security), Free Standards (open source), Bluetooth and other print and imaging standards communities.

TIMELINE

- 27 years – IBM
- Achieved BSEE Drexel University – 1979
- Served U.S. Coast Guard – 1971 to 1975
